

United States House of Representatives
Committee on Financial Services
2129 Rayburn House Office Building
Washington, D.C. 20515

June 8, 2026

Mr. Jamie Dimon
Chairman and Chief Executive Officer
JPMorgan Chase
270 Park Avenue
New York, NY 10017

Mr. Ted Pick
Chairman and Chief Executive Officer
Morgan Stanley
1585 Broadway
New York, NY 10036

Ms. Jane Fraser
Chair of the Board and Chief Executive
Officer
Citigroup Inc.
388 Greenwich Street
New York, NY 10013

Mr. Charlie Scharf
Chairman and Chief Executive Officer
Wells Fargo
420 Montgomery Street
San Francisco, California 94163

Mr. Brian Moynihan
Chair of the Board and Chief Executive
Officer
Bank of America Corporation
100 North Tryon Street
Charlotte, NC 28255

Mr. David Solomon
Chairman and Chief Executive Officer
The Goldman Sachs Group, Inc
200 West Street
New York, NY 10282

Mr. Dimon, Ms. Fraser, Mr. Moynihan, Mr. Pick, Mr. Scharf, and Mr. Solomon:

On April 7, Anthropic announced information on its Claude Mythos Preview, a new general purpose language model, which the company describes as “extremely autonomous” and extraordinarily capable at computer security tasks, software coding, and complex reasoning objectives.¹ According to Anthropic, Claude Mythos Preview “has already found thousands of high-severity vulnerabilities, including some in every major operating system and web browser.” Anthropic also notes that “[t]he fallout—for economies, public safety, and national security—could be severe.”² Reporting indicates that on April 7, 2026, Treasury Secretary Scott Bessent and Federal Reserve (Fed) Chair Jerome Powell summoned many of you to an urgent meeting, where they warned you about Mythos’ capabilities to detect potential cybersecurity weaknesses and the potential catastrophic risks that could arise from those capabilities.³

Anthropic established Project Glasswing to allow major banks, tech companies, and other firms to access Claude Mythos Preview and identify and fix vulnerabilities in their systems, as part of their defensive security strategy against cybercriminals and adversarial nations that could

³ [Bessent, Powell warned bank CEOs about Anthropic model risks, sources say](#), Reuters (Apr. 9, 2026); [Bessent and Powell’s A.I. Anxiety](#), New York Times (Apr. 10, 2026).

exploit cyber vulnerabilities with access to similar AI models. JPMorgan, Morgan Stanley, Goldman Sachs, Citi, and Bank of America have all indicated that they have access to Mythos.⁴ And just last week, on June 2, 2026, Anthropic expanded Project Glasswing to include 150 new organizations.⁵ Anthropic explains that for these partners “a major attack could affect more than 100 million people.”⁶

I am deeply concerned that the Committee has not been briefed by your banks on how you are confronting the heightened risks of cybersecurity vulnerabilities identified by Mythos, and your efforts to ensure your institutions operate in a safe and sound manner, protect consumers, and mitigate your risks to U.S. financial stability. I write to request that you provide a briefing on how your institution is responding to these issues to Democratic staff of the House Financial Services Committee (Committee) on a date no later than July 3, 2026. Bank CEOs’ lack of engagement, as these developments come to light, impairs the Committee’s ability to protect the public and the financial system as we know it from novel and existential AI risks, including those raised by the capabilities that AI models like Mythos have.

Please provide written answers to the questions listed below, ahead of the briefing.

1. According to Project Glasswing’s stated objectives, Anthropic will publicly report what partners have learned within 90 days.⁷ Project partners will also collaborate on recommendations that, among other items, include standards for regulated industries. At this stage, what regulations, rules, and guidance are you evaluating for potential gaps?
2. What responsible AI frameworks did your bank adopt and comply with prior to Anthropic’s Mythos developments? How is your bank revising these frameworks, if at all? What are your institutions’ internal guidance frameworks that may now require amplified security measures?
3. How are you coordinating information sharing with the White House, Treasury, other government agencies, and your financial regulators regarding vulnerabilities identified by Mythos?
4. Please describe your engagement, if any, with the Financial Services Sector Coordinating Council (FSSCC), the Financial Services Information Sharing and Analysis Center (FS-ISAC), and the Financial Sector Core Executive Response Group (CERG) regarding Mythos and Project Glasswing.
5. Given the interdependent nature of software and financial systems today, Mythos and future similar AI models could pose destabilizing and catastrophic risks to the financial system. The Financial Stability Oversight Council (FSOC), established by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, is, among other objectives, charged with identifying risks to financial stability in the U.S. Please describe any communication and information-sharing your organization has conducted with FSOC members in connection with Mythos and Project Glasswing. Please include any findings, risk assessments, or recommendations you have provided to FSOC members so far.
6. In addition to being deemed a global systemically important bank (G-SIB), what additional standards, if any, did you have to meet to be included in Project Glasswing?

⁴ [Banking industry scrambles for Anthropic's Mythos as global regulators review risks](#), Reuters (Apr. 20, 2026).

⁵ Anthropic, [Expanding Project Glasswing](#) (June 2, 2026).

⁶ *Id.*

⁷ Anthropic, [Project Glasswing](#) (accessed Apr. 24, 2026).

7. How is your bank, or Project Glasswing, making the vulnerabilities identified by Mythos and solutions you are developing to address those vulnerabilities available to other U.S. financial institutions?

Sincerely,

Representative Maxine Waters
Ranking Member

CC: The Honorable French Hill, Chairman, House Financial Services Committee
