THE CASE FOR HOLDING MEGABANKS ACCOUNTABLE:
AN EXAMINATION OF WELLS FARGO’S EGREGIOUS CONSUMER ABUSES

REPORT PREPARED BY THE DEMOCRATIC STAFF OF THE
COMMITTEE ON FINANCIAL SERVICES, U.S. HOUSE OF REPRESENTATIVES

THE HONORABLE MAXINE WATERS, RANKING MEMBER
115TH CONGRESS, FIRST SESSION
SEPTEMBER 29, 2017

This report has not been officially adopted by the Committee on Financial Services and may not necessarily reflect the views of its Members.

Executive Summary

On September 8, 2016, the Consumer Financial Protection Bureau (“Consumer Bureau”) announced a $100 million fine against Wells Fargo Bank, N.A. (“Wells Fargo”) for illegally opening millions of fraudulent credit card and deposit accounts in its customers’ names without their knowledge or consent. The Office of the Comptroller of the Currency (“OCC”) announced a $35 million civil penalty and the Office of the Los Angeles City Attorney (“LACA”) announced a $50 million civil penalty against the bank for the same abusive acts. The combination of a toxic, high-pressure sales environment at Wells Fargo—along with misconduct sanctioned, and even encouraged, by its executives—resulted in widespread consumer harm. Unfortunately, the fraudulent sales practices were not an isolated incident and instead have been revealed to be just one scandal in a series of revelations of other illicit customer abuses that have occurred at the bank.

In addition to these fines levied on the bank, Wells Fargo has paid out billions of dollars for a disturbingly consistent pattern of other wrongdoing. These practices, discussed in Section I, include illegal student loan servicing practices, inappropriate checking account overdraft fees, and unlawful mortgage lending practices, such as overcharging veterans for refinance loans. There are also allegations that the bank has engaged in unlawful practices that have not yet been subject to fines and enforcement actions, including enrolling customers in life insurance policies without their consent, delaying mortgage closing dates until after the expiration of borrowers’ interest rate lock to levy additional fees, and charging over 570,000 customers for auto insurance policies they did not need, which resulted in at least 20,000 customers, including active duty service members, having their vehicles inappropriately repossessed.

When megabanks like Wells Fargo engage in repeated, intentional, regular, deliberate, or institutionalized misconduct by violating laws and regulations that cause widespread and significant harm to innocent customers, such conduct warrants the use of regulators’ most severe enforcement tools to protect the interest of the public and ensure the integrity of the U.S. banking system.

As Section II of this report describes, the federal prudential banking regulators – the OCC, the Board of Governors of the Federal Reserve System (“Federal Reserve Board”), and the Federal Deposit Insurance Corporation (“FDIC”) – have enforcement tools beyond civil money

---

penalties that should be deployed to more effectively deter wrongdoing by highly profitable megabanks, for which even steep fines for illicit activity seem to amount to merely the cost of doing business. While regulators can impose large civil money penalties, only the federal prudential banking regulators have the authority to impose the most severe sanctions against a bank and its senior executives, such as restricting a bank’s line of business relating to any fraudulent activity, directing a bank to remove senior officers and directors and permanently banning them from working in the industry, revoking a bank’s national charter, or appointing a receiver to wind down a bank. These underutilized authorities should be, but have not been in the case of Wells Fargo, exercised in order to adequately combat rampant, illicit activity by a bank.

Obtaining a national charter and operating a federally-insured bank in the United States is a privilege, not an entitlement, which is conditioned upon compliance with all applicable laws and regulations and is subject to the regulatory purpose for which Congress established banking laws. The federal prudential banking regulators’ seeming unwillingness to exercise their strongest statutory enforcement powers demonstrates the need for an additional review from Congress. Legislation is needed to address the regulators’ reluctance to use all available enforcement powers, and to underscore the importance of deterrence to these regulators and the banks they supervise. Because megabanks offer and provide financial products and services to millions of American consumers, it is particularly important for Congress to close any loopholes that have shielded executives and senior management at these institutions who knew, or should have known, about the repeated violations of consumer protections that transpired under their leadership. Potential remedies to address this problem will be discussed in Section III.

Unfortunately, the House Financial Services Committee (“Committee”) Republicans’ investigation into Wells Fargo’s fraudulent sales practices has focused primarily on the role of the Consumer Bureau instead of the long list of illegal conduct by the bank outlined in this report. Furthermore, Committee Republicans have yet to announce any hearings this year to have Wells Fargo’s senior leadership discuss additional revelations of wrongdoing that have been unmasked since the last hearing held on this matter over a year ago in September 2016, despite a specific request by the Committee’s Ranking Member and other senior Committee Democrats to do so. In lieu of a more robust and holistic investigation by Committee Republicans, this staff report attempts to shine a light on Wells Fargo’s long list of illicit activities that have harmed consumers, identify the broad array of enforcement tools available to regulators, and underscore potential legislative and regulatory solutions that would better protect consumers and to achieve actual accountability for unlawful practices at megabanks by ensuring the leadership within these institutions are held accountable. Such steps would serve as a deterrent to stop megabanks from continuing to engage in schemes that reap huge profits at the expense of consumers and in violation of laws and regulations.
Findings

Wells Fargo Has Demonstrated a Pattern of Egregiously Harming Its Customers

- Wells Fargo has repeatedly engaged in a pattern of consumer abuses and other violations of law, which have unjustly enriched the bank at the expense of the bank’s customers.
- When a megabank has engaged in a pattern of extensive violations of law that harms millions of consumers, like Wells Fargo has, it should not be allowed to continue to operate within our nation’s banking system, and avail itself of all of the associated privileges afforded to it.

Prudential Regulators Have Failed to Use Their Most Severe Tools to Shut Down Recidivist Megabanks

- To date, Wells Fargo has not been deterred by the current enforcement tools utilized by regulators. Even civil money penalties in the billions have proven ineffective in stopping a trillion dollar megabank like Wells Fargo from engaging in practices that repeatedly harm consumers, because fines — even extremely large ones — solely amount to the “cost of doing business” for these institutions. Furthermore, penalties imposed on megabanks are often actually paid by shareholders, not the chief executives and senior officials responsible for the wrongdoing at the institution. As such, while fines have resulted in bad publicity that may temporarily lower a bank’s share prices, the leadership within these megabanks, who condoned or failed to stop the unlawful practices, are rarely, if ever, held personally accountable.
- While regulators, including the Consumer Bureau, have the authority to impose civil money penalties, and have done so, federal prudential banking regulators, including the OCC, Federal Reserve Board, and FDIC, have not fully utilized other enforcement tools with respect to Wells Fargo, including restricting the bank’s line of business, directing the bank to remove senior officers and directors and barring them from working at another bank, revoking the bank’s charter, or terminating the bank’s federal deposit insurance.

Effective Deterrence Demands the Use of Robust Enforcement Tools to End Unlawful Practices of Megabanks and their Senior Officers and Directors

- If federal prudential banking regulators refuse to deploy their most aggressive enforcement tools to shut down a megabank like Wells Fargo that has engaged in a pattern of repeated violations of consumer protection laws, Congress should consider legislation mandating the use of these tools to finally end such conduct and examine ways to improve accountability and address barriers that have previously prevented regulators and law enforcement from imposing civil and criminal penalties against the senior executives at these megabanks.
- Committee Republicans’ failure to conduct a full-scale investigation into the long list of Wells Fargo’s illicit practices or agree to Committee Democrats’ request to hold a follow-up hearing with Wells Fargo’s current executives demonstrates a fatal flaw in the scope and credibility of the Committee Republican’s investigation to date. Instead of a tunnel-vision focus on the Consumer Bureau, the Committee should more fully review Wells Fargo’s misdeeds, the full suite of enforcement tools that can be used by all federal prudential banking regulators, and consider legislative and regulatory remedies that may
be needed to ensure that a megabank cannot engage in a pattern of illicit activity that harms millions of consumers with impunity.

I. Repeat Offender: Wells Fargo and its Record of Repeatedly and Egregiously Harming its Customers

Wells Fargo has established a track record of repeatedly and egregiously harming its customers in an astonishing and growing variety of ways. According to one estimate, Wells Fargo & Company and its subsidiaries have paid over $11 billion in fines and penalties for consumer and other violations since 2000. It appears that a series of large monetary penalties have not been a sufficient deterrent for Wells Fargo, a company with over $1.93 trillion in assets that has generated over $200 billion in profits since 2000.

As some observers and experts have noted, large fines amount to the “cost of doing business” for large corporations and megabanks like Wells Fargo, and they do not serve as an adequate deterrent to stop similar bad behavior. Indeed, Wells Fargo has continually chosen to eschew its consumer protection responsibilities, and instead has presumably engaged in systematic abuses to maximize profits. A sample of the bank’s most grievous actions, which appear to permeate every division of its consumer lending business, are detailed below.

---

8 Wells Fargo & Company Annual Reports and Proxy Statements, available at: https://www.wellsfargo.com/about/investor-relations/annual-reports/. Since the inception of Wells Fargo’s fraudulent account scandal, which is believed to be in 2001, Wells Fargo has accumulated nearly $200 billion in profits. See appendix for annual profits by year for Wells Fargo.

A. Millions of Fraudulent Customer Accounts

On September 8, 2016, the Consumer Bureau, the Office of the Los Angeles City Attorney, and the OCC revealed that Wells Fargo had opened at least 2 million customer accounts without the authorization or knowledge of its customers. Under its consent order with the Consumer Bureau, Wells Fargo is required to take a number of remedial steps to improve its compliance with federal consumer protection laws, pay restitution to consumers harmed by the bank’s fraudulent account scandal, and pay civil money penalties of $100 million. Under its

Consumer Financial Protection Bureau, In the Matter of: Wells Fargo Bank, N.A. Consent Order, 2016-CFPB-0015 (Sept. 8, 2016), available at: http://files.consumerfinance.gov/f/documents/092016_cfpb_WFBconsentorder.pdf. Subsequent actions that have occurred since Wells Fargo was exposed for its fraudulent account scandal include, the firing of more than 5,300 Wells Fargo employees, removal of 700 manager positions, clawbacks of over $70 million in bonuses paid to four executives, and the resignation of the bank’s former chief executive officer, John Stumpf. Additionally, Wells Fargo

7
consent order with the OCC, the bank also agreed to take certain remedial steps to address its sales practices that were deemed unsafe or unsound business practices by the agency, and pay an additional $35 million civil money penalty to the OCC. Wells Fargo agreed to another $50 million in penalties as settlement to its lawsuit with the LACA.12

In Wells Fargo’s March 2017 annual public SEC filing, the bank warned investors that its original estimate of the number of accounts opened during the fraudulent account scandal period may have been low, and recently, Wells Fargo disclosed that a third-party review of Wells Fargo’s business records indicates that the number of fraudulent accounts is closer to 3.5 million from the period of January 2009 to September 2016.13

Wells Fargo’s fraudulent account practices began in 2002, if not earlier. The company’s troubling sales practices (a result of “cross-selling”) and the employee misconduct that emanated from them were sanctioned, and even encouraged, by upper-level management within the company. Per Wells Fargo’s own records, its employees would open unauthorized customer checking accounts to meet sales goals, and then transfer funds from consumers’ authorized accounts to fund the unauthorized ones. Furthermore, the bank’s employees opened unauthorized credit card accounts by “utilizing a bank database to identify customers who had been pre-approved for credit cards, then ordered cards without asking them.”15

According to an internal investigation performed by Wells Fargo’s Independent Directors of the Board, “[i]n 2002, the Community Bank [Wells Fargo] took steps to address an increase in

---

sales practice violations,”16 and “until as late as 2015...sales practices were labeled a ‘high risk’ in materials provided to the Risk Committee of the Board.”17 However, in June 2016, when asked about the company’s aggressive cross-selling culture, current Wells Fargo Chief Executive Officer Tim Sloan, who was then the bank’s Chief Financial Officer, said that the company had not “pushed that strategy to the limit” and “the fundamental strategy that [Wells Fargo had was] not going to change.”18 Wells Fargo’s executives and directors of the Board did not address the aggressive sales practices until after the September 8, 2016 regulatory enforcement action. On September 13, 2016, the bank eliminated product sales goals in the retail bank, and in January 2017 the bank put a new incentive program in place that focused on customer service rather than selling products.19

As a result of the fraudulent account scandal, Wells Fargo’s customers incurred financial penalties for having insufficient funds in their accounts with the bank, were charged unwarranted fees and finance charges for credit cards opened without their consent, and consequently may have had their credit scores negatively impacted.20

Below is the state-by-state list, provided to the Committee by Wells Fargo, of the number of checking and credit card accounts opened by Wells Fargo staff within the 2.1 million fraudulent accounts initially identified in 2016, as well as a breakdown of how many employees were fired per state of the 5,300 employees fired between 2011 and 2015.

*N/A is listed for states in which the number of employees fired in connection with the fraudulent account scandal was not provided.

Moreover, Wells Fargo previously attempted to enforce its mandatory pre-dispute arbitration clauses in the contracts of these defrauded customers in an effort to block harmed consumers from joining together in a class-action suit and pursuing remedies in a court of law. Although Wells Fargo eventually gave up its fight to compel arbitration in one of the larger settlement cases, the bank’s blatant attempts to evade full responsibility and mitigate customer redress are shocking. In a response to a written question from Committee Democrats, former Wells Fargo CEO John Stumpf wrote, “We are working to connect with customers and, for those negatively impacted by unauthorized accounts, to fix the issues. For those cases that may require additional attention, Wells Fargo is offering a no-cost mediation option to its customers.”

However, Mr. Stumpf neglected to mention that banks like Wells Fargo win an overwhelming 93 percent of these “no-cost mediation” proceedings initiated under mandatory pre-dispute arbitration clauses, and in the rare instances that consumers do recover money under arbitration, the recovery on average is only 12 cents on each dollar that they have lost due to anti-consumer practices by the bank.

On a related note, Congressional Republicans have been aggressively attempting to pass a joint resolution pursuant to the Congressional Review Act that would repeal a new rule the Consumer Bureau finalized earlier this year to prevent financial institutions, like Wells Fargo, from using mandatory pre-dispute arbitration clauses to restrict consumers ability to join with

other harmed consumers and seek remedies in court.24 The House passed such a measure on July 25, 2017,25 and the Senate may take up the matter soon.

B. Illegal Student Loan Servicing Practices

In August 2016, the Consumer Bureau took action against Wells Fargo for the bank’s illegal student loan servicing practices.26 After investigating the bank for 10 months,27 the Consumer Bureau found that Wells Fargo “failed to provide important payment information to consumers, charged consumers illegal fees, and failed to update inaccurate credit report information.”28 Under the consent order with the bank, the Consumer Bureau required Wells Fargo to reimburse harmed customers the amount of $410,000 and pay an additional $3.6 million dollars in civil money penalties.29 According to the Consumer Bureau’s findings stated in the consent order, in a familiar pattern for the bank, Wells Fargo processed student loan payments in a way that caused its customers to incur additional costs and fees in an attempt to maximize the bank’s profits.30 According to Richard Cordray, the Director of the Consumer Bureau, “Wells Fargo hit borrowers with illegal fees and deprived others of critical information needed to effectively manage their student loan accounts.” In a time when over 44 million borrowers in the U.S. have more than $1.34 trillion in student loan debt, and one in six of those borrowers are severely delinquent in repayment,31 Wells Fargo’s actions constitute a failure that has unduly

increased the amount of delinquent student loan accounts, and unjustly caused financial harm to its private student loan borrowers.

C. Checking Account Overdraft Fees

In dozens of separate cases seeking class action status, Wells Fargo is accused of re-ordering the posting of consumer debit card charges in order to obtain the maximum amount of overdraft fees from its customers. Prior to 2001, Wells Fargo posted debits from low-to-high (as was common industry practice at that time), which allowed for as many items as the account balance could possibly cover before any overdraft fees would be charged for insufficient funds tied to overdrafts. However, starting in 2001, Wells Fargo began resequencing debit transactions to post in highest-to-lowest order, which had the immediate effect of maximizing the number of overdraft fees charged to customers.32

In the 2010 class action case, Gutierrez v. Wells Fargo Bank, N.A., the U.S. District Court of the Northern District of California found that Wells Fargo’s actions were deliberate, calculated, and the result of a brazen push for profits.33 In spite of Wells Fargo’s claims that there was no nefarious intent behind its decision to reorder customer debit transactions, the judge in the case stated that:

“The trial record [in the case] is most telling about the true reasons Wells Fargo adopted high-to-low bookkeeping […]. Internal bank memos and emails leave no doubt that, overdraft revenue being a big profit center, the bank's dominant, indeed sole, motive was to maximize the number of overdrafts and squeeze as much as possible out of what it called its "ODRI [overdraft/returned item] customers" and particularly out of the four percent of ODRI customers it recognized supplied a whopping 40 percent of its total overdraft and returned-item revenue. This internal history — which is laid bare in the bank's internal memos — is so at odds with the bank's theme of "open and honest" communication and that "overdrafts must be discouraged" that the details will be spread herein[…]

Overdraft fees are the second-largest source of revenue for Wells Fargo's consumer deposits group, the division of the bank dedicated to providing customers with checking accounts, savings accounts, and debit cards. The revenue generated from these fees has been massive. In California alone, Wells Fargo assessed over $1.4 billion in overdraft penalties between 2005 and 2007. Only spread income — money the bank generated using deposited funds — produced more revenue.” (emphasis added).”34

32 See Gutierrez v. Wells Fargo Bank, N.A., 730 F. Supp. 2d 1080 (2010) (“To illustrate, assume that a customer has $100 in his account and uses his debit card to buy ten small items totaling $99 followed by one large item for $100, all of which are presented to the bank for payment on the same business day. Using a low-to-high posting order, there would be only be one overdraft — the one triggered by the $100 purchase. Using high-to-low resequencing, however, there would be ten overdrafts — because the largest $100 item would be posted first and thus would use up the balance as quickly as possible.”).
33 Id.
34 Id.
The district court ordered Wells Fargo to stop posting transactions in high-to-low order, and to pay out $203 million in restitution to its customers. Nevertheless, Wells Fargo continues to defend its abusive and deceptive overdraft practices. While other large banks settled similar class action lawsuits, Wells Fargo is still pursuing an appeal to overturn the California district court ruling and push its aggrieved customers into bank-friendly forced arbitration proceedings.

D. Mortgage Lending

i. VA Loan Refinancing Fraud

Wells Fargo is accused of violating the False Claims Act by defrauding veterans and charging them illegal fees under its mortgage refinance program, and then concealing those fees from the government so the bank could receive guarantees from the U.S. Department of Veterans Affairs. When lenders provide veteran borrowers with interest rate reduction refinance loans on their homes, the lenders are not allowed to charge attorney fees, escrow fees, or closing fees, but they are authorized to charge a reasonable fee for a title examination. In 2006, a group of whistleblowers revealed that Wells Fargo was advising brokers that the impermissible fees should lumped into title examination costs. As a result, veterans were paying hundreds of dollars more than they needed to pay to refinance. The government was also harmed because it was guaranteeing the loans, and the additional costs raised the risk of default on the loans. Wells Fargo claimed that it lacked the intent necessary to violate the False Claims Act, but on August 4, 2017, the bank paid the government $108 million to settle a lawsuit related to the allegations.

ii. Discriminatory Mortgage Lending

Over the past several years, the cities of Los Angeles, Miami, Oakland, Baltimore, Memphis, and Philadelphia have all filed lawsuits against Wells Fargo, asserting that the bank steered African-American and Latino homebuyers into more expensive mortgages compared to

35 Id.
37 It is worth noting that Wells Fargo only attempted to invoke its forced-arbitration contract provisions after it lost the overdraft fee suit at the trial level, once again demonstrating how large companies depend on forced arbitration clauses as a means to evade accountability. In 2016, a Florida district court advised Wells Fargo that it waived any rights it had to compel arbitration when it chose instead to litigate for years in hopes of winning in court, but Wells Fargo continues to pursue arbitration in an attempt to avoid paying out restitution to its victims in the class action suits.
38 31 U.S.C. §§ 3729 - 3733. The False Claims Act gives the government and citizens the right to sue people or corporations who knowingly submit a false claim for payment to the government.
42 Id.
their white counterparts, which is a violation of the Fair Housing Act of 1986, and resulted in a disparate number of foreclosures for minority borrowers. According to the City of Los Angeles, between 2004 and 2014, Wells Fargo’s African-American borrowers were twice as likely to receive high-cost loans when compared with white borrowers with similar credit backgrounds, and Latino borrowers were 1.7 times as likely to receive costly loans when compared with white borrowers with similar credit backgrounds. The U.S. District Court of the Northern District of California ultimately decided that the city would need to present additional evidence to support the allegations in its complaint that policies of the bank pushed minority borrowers into pricier or riskier mortgages than those offered to white borrowers, and the U.S. Ninth Circuit Court of Appeals upheld the lower court’s decision. However, the U.S. Supreme Court has ruled that cities can sue banks for such violations under the Fair Housing Act, and several cities have severed ties with the bank. Philadelphia City Councilwoman Cindy Bass has even called the bank the “antithesis of corporate social responsibility.”

Wells Fargo is also accused of negligently maintaining homes in predominantly minority neighborhoods during the same time frame. According to research by the National Fair Housing Alliance (“NFHA”), Wells Fargo maintained and marketed properties that it owned in predominantly white areas “in materially better condition” than properties that it owned in neighborhoods that are predominantly African-American, Latino, or non-white, all in violation of the Fair Housing Act. Wells Fargo paid $42 million to settle a lawsuit regarding these allegations.

---

44 City of Los Angeles v. Wells Fargo & Co., 2015 U.S. Dist. LEXIS 93451, 2015 WL 4398858 (2015) (“In describing the specifics of reverse redlining, the City of Los Angeles identifies in its complaint eight types of allegedly "predatory" home loans issued by Wells Fargo to minority borrowers: (1) high-cost loans (defined by the City as loans with an interest rate three percentage points or more above the federally established benchmark); (2) subprime loans; (3) interest-only loans; (4) balloon payment loans; (5) loans with prepayment penalties; (6) negative-amortization loans; (7) no-documentation loans; and (8) adjustable rate mortgage loans with "teaser" rates.”).
45 Id.
Wells Fargo previously paid $175 million dollars to the U.S. Department of Justice (“DOJ”) — the second largest fair lending settlement in the DOJ’s history — over allegations that it overcharged borrowers of color for mortgage loans and wrongly steered them into subprime mortgages during the financial crisis, which one DOJ official called “a “racial surtax.”

While discussing the DOJ settlement, an Assistant U.S. Attorney General opined that the Wells Fargo case was “about real people, African-American and Latino, who suffered real harm as a result of Wells Fargo’s discriminatory lending practices,” and that “people with similar qualifications […] should be judged by the content of their creditworthiness and not the color of their skin.”

**iii. Illegal Loan Modifications**

In June 2017, certain borrowers seeking bankruptcy protection filed a class action lawsuit against Wells Fargo in the U.S. Bankruptcy Court for the Western District of North Carolina, claiming the bank has improperly used the Bankruptcy Code and Rules to force debtors into mortgage loan modifications that neither the borrowers nor the bankruptcy courts presiding over the related bankruptcy cases requested or approved. According to the filed complaint, the bank has an unlawful practice of filing unauthorized Notice of Mortgage Payment Change forms in bankruptcy proceedings, which may slightly reduce the borrower’s monthly mortgage payments, but also extends the term of the mortgage by decades and thereby exposes the borrower to tens of thousands of dollars more in additional interest payments. In defiance of multiple court orders that instruct Wells Fargo to withdraw its unauthorized mortgage modifications in several cases because they were violations of due process, the bank has continued to file unauthorized Notice of Mortgage Payment Change forms in bankruptcy proceedings. In addition to the class action lawsuit, seven other cases criticizing the bank’s loan modification practices have arisen in

---

55 Id. at pgs. 8-13. The named plaintiffs in the class action lawsuit, the Cottons, claim that they had voluntarily filed a Chapter 13 bankruptcy petition, but were current on their mortgage payments to Wells Fargo when the bankruptcy petition was filed and remained current on their mortgage payments throughout the pendency of their bankruptcy case. However, without the Cottons knowledge or consent, Wells Fargo filed a mortgage payment change notice with the bankruptcy court, requesting modification of the Cotton’s mortgage payments to be paid by the appointed Trustee. The mortgage payment amounts were reduced by approximately $130 per month, however, the term of the Cotton’s mortgage was extended by nearly 26 years, which would result in up to $129,319 in additional interest fees.  
Louisiana, New Jersey, North Carolina, Pennsylvania, and Texas. Some borrowers even allege that Wells Fargo’s unlawful practice of modifying mortgage terms without the borrower’s consent or knowledge have sent them into bankruptcy. Wells Fargo has admitted to pushing unknowing customers into these modifications “at least 100 times in cases that were pending as of April 24, 2017,” and the bank has profited handsomely from the loan modifications, receiving “up to $1,600” from the government for each distressed loan it modified. In response to one borrower complaint related to the unwanted loan modifications, a bankruptcy court judge called Wells Fargo’s practices “beyond the pale of due process.”

### iv. Fraudulent Mortgage Fees

When consumers apply for mortgages, it is standard industry practice for lenders to guarantee an interest rate for the borrower for a set period of time, typically 30 to 60 days. These interest rate “locks” protect borrowers from rising interest rates while they are attempting to buy a home. In January 2017, investigative reporters discovered that Wells Fargo was systematically delaying customers’ mortgage closing dates until after the expiration of the borrower’s interest rate lock period in an attempt to pocket additional fees. Former bank employees in Los Angeles said the delays “were usually the bank’s fault, but management forced them to blame the customers.” As a result, customers ended up paying fees of $1,500 or more for the bank’s deceptive practices. Since the story was initially published, other current and former Wells Fargo employees and customers have come forward to corroborate the claims, and allege that these practices extend far beyond the Los Angeles area. Furthermore, a former Wells Fargo employee said that he was fired for trying to report the abuses—which included wrongfully blaming customers for the bank’s errors and falsifying documents to back up the bank’s false narratives—in violation of federal whistleblower laws. A former branch officer who was aware of the practices said: “I believed in Wells Fargo. I loved Wells Fargo. But it was just stealing from people.”

E. Auto Lending Abuses

In July 2017, the New York Times published an article detailing how more than 800,000 people who obtained auto loans from Wells Fargo were charged for collateral protection insurance (“CPI” or “forced-placed auto insurance”) they did not need.69 Wells Fargo had a commercial insurance agreement with National General under which National General was instructed to place CPI on any auto loans for borrowers that National General or Wells Fargo could not confirm had insurance to cover the outstanding balance of the auto loan. However, Wells Fargo’s CPI program was administered in a negligent manner, and as a result, over 274,000 Wells Fargo auto loan customers were pushed into delinquency on their loans and over 25,000 customers, including active-duty military and veterans, had their vehicles wrongly repossessed.70 Wells Fargo alleges that “only” 570,000 of its customers were harmed by the misplaced CPI policies but admitted that the unnecessary CPI policies may have caused approximately 20,000 auto loan customers to go into default and resulted in their vehicles being wrongly repossessed.71 In a press release, Wells Fargo stated that it “[takes] full responsibility for [its] failure to appropriately manage [its CPI program] and [is] extremely sorry for any harm this caused [its] customers, who expect and deserve better.”72 Wells Fargo customers do indeed deserve better, but the approximately $64 million in cash remediation that Wells Fargo plans to remit to its customers73 will not be enough to compensate the thousands of consumers who suffered far more than financial harm: damage to credit reports, emotional harm from repossession, and potential loss of employment from a lack of access to a vehicle all add up to an inexcusable amount of injury.74 Per the Washington Post, “the effect on customers whose cars were repossessed is likely … catastrophic — similar to losing your home in a foreclosure or declaring bankruptcy — and could last for years.”75 According to the Washington Post article, one victim of the forced-placed auto insurance scandal, Samir Hanef, had his car repossessed and missed work as a result of Wells Fargo’s mistakes. He underscored the emotional damage, not just financial harm, he endured because of the unlawful practice, recounting that “the stress and anxiety ... [were] truly indescribable.”76

70 Id.
72 Id.
73 Id.
76 Id.
This auto insurance scandal came to light only months after Wells Fargo paid $24 million to settle allegations that it wrongfully repossessed vehicles from active-duty military members and charged them higher interest rates in violation of the Servicemembers Civil Relief Act. The DOJ ordered Wells Fargo to pay a $4.1 million penalty for that wrongdoing. In an announcement about the settlement, a U.S. District Attorney stated that, “We all have an obligation to ensure that the women and men who serve our country in the Armed Forces are afforded all of the rights they are due, [and] Wells Fargo failed in that obligation.”

F. Committee Republicans’ Flawed Investigation into Wells Fargo’s Bad Practices and Continued Misguided Attacks on the Consumer Bureau

Instead of investigating all of the illegal conduct of Wells Fargo, including the list of nefarious actions identified in this report that resulted in tremendous consumer harm, Committee Republicans have singled out the Consumer Bureau for attention, perhaps as a means of pursuing an ideological mission of functionally terminating the Consumer Bureau. While the Consumer Bureau has taken actions against Wells Fargo, including for the fraudulent customer account scandal, it is worth noting the Consumer Bureau was not even established until nearly a decade after Wells Fargo employees had begun creating fraudulent accounts to meet the bank’s aggressive sales goals. Rather, the OCC was the bank’s primary regulator during this period, and the OCC’s Ombudsman even issued a report admitting to the OCC’s shortcomings in supervising the bank. Despite the OCC’s acknowledgment of its supervisory deficiencies in this matter, Committee Republicans have ignored both the OCC’s critical supervisory failures that enabled Wells Fargo to continue its fraudulent customer account scandal for a decade and the ongoing misdeeds of the bank. Furthermore, Committee Republicans have given minimal attention to authorities federal prudential regulators have yet to deploy, described in detail in the next section of the report.

In light of the growing list of consumer abuses documented earlier in this report, Ranking Member Maxine Waters (D-CA), Vice Ranking Member Daniel T. Kildee (D-MI), and Oversight and Investigations Subcommittee Ranking Member Al Green (D-TX), sent a letter to Chairman Hensarling on August 1, 2017, requesting that the Committee hold a hearing with Wells Fargo’s top executives, writing, “[T]here have been seemingly never-ending developments

79 Id.
about additional customers who have been harmed in a number of ways by the bank that clearly warrant Committee scrutiny.”

The letter goes on to note that instead of engaging in a bipartisan investigation, Committee Republicans have run a partisan one, with Republican staff holding secret, unrecorded interviews with the Chief Executive Officer, Chief Financial Officer, General Counsel and Chief Risk Officer for Wells Fargo for three days in December 2016. Despite repeated requests, Wells Fargo executives have not submitted to interviews with Democratic staff. In addition, over 33 consumer advocacy groups have sent letters to Chairman Hensarling and the Senate Banking Committee urging additional hearings on Wells Fargo’s ongoing fraud.

Chairman Hensarling replied to the letter led by Ranking Member Waters on August 14, 2017, writing that staff-level briefings were taking place, and that, “The investigation will proceed in an orderly fashion,” without committing to hold a hearing or even responding to the request to hold a hearing, in spite of the fact that former Wells Fargo CEO John Stumpf may have lied to Congress about the extent of the bank’s issues when he last testified in September 2016. The Committee has numerous oversight authorities at its disposal that it has thus far failed to utilize. These include conducting bipartisan depositions of senior Wells Fargo executives, performing more investigative due diligence with a broader scope focused on the bank to reveal how widespread the illegal activity has been, and pressing federal prudential bank regulators like the OCC to take stronger, more meaningful enforcement actions than they have taken thus far.

It is crucial for the Committee to investigate all of the recent revelations concerning Wells Fargo’s wrongdoing and to hold additional public hearings this term to explore these newly uncovered issues, and what steps regulators, especially federal prudential bank regulators, should take to better hold megabanks accountable for their actions.

II. Federal Regulators Must Take Stronger Actions: Ineffective Deterrence Underscores Need to Shut Down Banks like Wells Fargo

Various government agencies have important roles to play in supervising banks under their purview and enforcing federal laws and regulations with respect to operating in a safe and sound manner, as well as complying with consumer protection laws. For the largest banks, like Wells Fargo, all three of the federal prudential banking regulators and the Consumer Bureau have certain enforcement authorities that the agencies could rely on in requiring the bank to comply with federal laws. The OCC, Wells Fargo’s primary federal regulator, has a range of enforcement tools at its disposal to oversee safety, soundness, and consumer protections of the bank. The FDIC also has enforcement authority over Wells Fargo, because the bank is an insured depository institution, and the Federal Reserve Board, as the regulator of bank holding

---

84 https://www.nytimes.com/2017/08/31/business/wells-fargo-testimony.html?mcubz=0&_r=0
companies, has enforcement authority over Wells Fargo’s parent holding company. Lastly, the Consumer Bureau, as the watchdog of consumer protection laws, has the authority to supervise Wells Fargo for compliance with federal consumer protection laws.

In the case of Wells Fargo, while various civil monetary penalties have been applied in a number of cases, there are other authorities that the federal prudential banking regulators have not utilized that should be exercised to stop the bank from repeatedly and egregiously ripping off its customers.

A. Statutory Authorities of the Regulators

The Consumer Bureau has made great strides in promoting consumers’ financial protection, including returning over $12 billion to 29 million harmed consumers since the agency was established. However, unlike the federal prudential banking regulators, the Consumer Bureau is not a charting or licensing agency. The Consumer Bureau has the authority to examine financial institutions for compliance with federal consumer protection laws, but its enforcement powers are more akin to those of a law enforcement agency, like the Federal Trade Commission or the Department of Justice. The Consumer Bureau’s enforcement tools include investigative authority and the ability to (i) conduct hearings and adjudication proceedings; (ii) commence civil action lawsuits and make referrals to the U.S. Attorney General for criminal proceedings; (iii) issue consent orders, under which restitution, refunds, rescission or reformation of contracts, or claw-back of compensation is required; and (iv) impose civil money penalties.

The federal prudential banking regulators, on the other hand, have certain supervisory enforcement powers that impact the operations of a banking organization, including the authority to revoke a charter or operating license of a banking organization. For example, under the National Bank Act, the Comptroller of the Currency (“Comptroller”) is entrusted with the authority to determine whether an institution is lawfully entitled to commence the business of

85 See H.R. Dem. Staff Rep., The Consumer Financial Protection Bureau In Perspective (July 21, 2017) (The Federal prudential banking regulators — OCC, FDIC, and the Federal Reserve Board — have been entrusted and authorized with the responsibility of supervising banking organizations and financial institutions operating in the U.S., including Wells Fargo. Before the enactment of the Dodd-Frank Act in 2010, these regulators were responsible for supervising banks for both safety and soundness and compliance with Federal consumer protection laws. During the 2008 financial crisis, however, Congress found that regulators were not enforcing Federal consumer protection laws appropriately, which led to widespread consumer abuses that in turn fueled the crisis and led to the collapse of the U.S. banking system. In order to protect the financial interest of consumers and restore integrity in the banking system, as part of the Dodd-Frank Act, Congress enacted the Consumer Financial Protection Act and established the Consumer Bureau. Pursuant to the Dodd-Frank Act, the responsibility for examining and supervising large banks, like Wells Fargo, for compliance with Federal consumer protection laws was then transferred from each of the prudential banking regulators to the Consumer Bureau.), available at: https://democrats-financialservices.house.gov/uploadedfiles/cfpb_staff_report.pdf.
86 12 USC §§ 5561-5566. The Consumer Bureau may also seek these relief measures as part of administrative or court proceedings, as well as “limits on the activities or functions” of an institution. See, 12 USC § 5565(a)(2).
88 12 USC § 21 et seq.
banking (i.e. entitled to a national bank charter), and banks that obtain national charters are subject to the rules, regulations and orders of the Comptroller, as well as subject to the same rights, privileges, duties, restrictions, penalties, liabilities, conditions, and limitations that apply under the national banking laws to a national bank. In addition, the Comptroller has statutory authority to revoke the national charter of a bank if the bank is found to violate the National Bank Act or Federal Reserve Act, as well as impose penalties on a bank or any “institution-affiliated party” of a bank (i.e. any director, officer, employee, or controlling shareholder of, or agent for a bank). The Comptroller may also appoint a receiver for a national bank to wind the institution down if it has satisfied one of a number of criteria under the Federal Deposit Insurance Act. Under the Federal Deposit Insurance Act, the Board of Directors of the FDIC (“FDIC Board”), as the overseer of the Federal Deposit Insurance Fund, is responsible for deciding which institutions qualify for federal deposit insurance, which is a necessity if the bank intends to receive deposits other than trust funds. In considering whether to grant a depository institution federal deposit insurance, the FDIC Board is required to consider, among other things, “the general character and fitness of the management of the depository institution,” and “the convenience and needs of the community to be served” by the institution. The FDIC Board also has the statutory authority to terminate the federal deposit insurance of a financial institution on a number of grounds, including if the FDIC Board finds that the depository institution or its directors or trustees have engaged or are engaging in unsafe or unsound business practices, as well as if an institution or its directors or trustees have violated any applicable law or regulation.

In addition, the federal prudential banking regulators have a number of other supervisory tools, public and nonpublic, to force a banking organization to comply with federal banking laws and regulations, including federal consumer protection laws and regulations. Such tools include:

- The ability to enter into informal and formal written agreements that require remediation by noncompliant institutions;
- The ability to issue civil money penalties;
- The ability to enter into consent orders that (i) require restitution or reimbursement; (ii) restrict the growth of an institution; (iii) require disposition of a loan or asset; (iv) rescind agreements or contracts; (v) require an institution to employ qualified officers, or employees; or (vi) mandates any other action the regulator determines to be appropriate;

• The ability to place limitations on the activities or functions of a bank or any
director, officer, controlling shareholder, or employee of a bank for violations of
federal banking laws or regulations; 98 and,
• The ability to require removal of a director, officer, or employee that is directly or
indirectly responsible for an institution violating a law, regulation, consent order,
or written condition of the regulator. 99

B. The Prudential Regulators’ Failures with Wells Fargo and the Fraudulent
Account Scandal

Notwithstanding the vast variety of supervisory tools available to the federal prudential
banking regulators in supervising banks and enforcing federal banking laws, regulators currently
rely predominantly on consent orders and civil money penalties when there are consumer
protection issues. A review of available case law and publicly available agency actions shows
that the regulators tend to use their most aggressive enforcement tools, including revocation of a
national bank charter and termination of deposit insurance, only in instances where a financial
institution’s activities rise to the level of criminal liability, threaten the solvency of the
institution, or threaten the financial stability of the banking system. Even when a financial
institution’s violations have demonstrated a pattern and practice of reckless, unsafe, or unsound
business practices, the prudential regulators have not used their most effective and statutorily
available enforcement measures in curtailing such consumer protection violations by large banks.

For example, the OCC, the primary regulator of Wells Fargo, was well aware of Wells
Fargo’s consumer protection violations for over a decade. The OCC identified issues with the
bank’s sales practices as early as 2005 (Wells Fargo’s internal investigation suggested these
fraudulent practices began at least in 2002 if not earlier), but failed to take timely and effective
supervisory or enforcement actions to curtail the practices of the bank. 100 According to the
OCC’s Ombudsman’s report on the OCC’s shortcomings in supervising Wells Fargo, the OCC’s
supervisory record for Wells Fargo “indicated several missed opportunities to perform
comprehensive analyses and take more timely action beginning in 2010.” 101 The OCC’s failures
included (1) untimely and ineffective supervisory actions after the OCC identified significant
issues with the bank’s complaint management and sales practices, including “fail[ure] to
document the resolution of [over 700] whistleblower cases …[and] fail[ure] to follow-up on
significant complaint management and sales practices issues”; (2) untimely and ineffective
supervision of the bank’s incentive sales program; (3) ineffective communication and follow-up
regarding matters requiring attention communicated by the OCC to bank staff; (4) failure to
address the bank’s noncompliance with OCC guidance related to risk management and sales
practices; and (5) unclear supervisory records. 102 In any of these areas and at any time after

102 Id. at pgs. 4-12.
identifying significant issues with the bank, the OCC could have taken enforcement action against the bank. However, the OCC failed to take any public actions against the bank until after the Consumer Bureau and LACA intervened, and the OCC’s public response was limited to a consent order and civil money penalties, as well as a downgrade of the bank’s CRA exam rating. Based on the OCC’s supervisory review record of the bank and a lack of evidence that Wells Fargo attempted to provide meaningful restitution to consumers once it discovered the issue, it is evident that the restitution, civil money penalties, and remediation commitments obtained from Wells Fargo under its settlement agreements with the CFPB, OCC, and LACA would not have otherwise been obtained absent the intervention of the Consumer Bureau in investigating the bank, and the Consumer Bureau’s effective enforcement authority, including its ability to demand vital information through its pre-litigation subpoena power and CID authority.

While the OCC was aware of Wells Fargo’s unlawful sales practices years ago, the agency’s mishandling of the bank’s CRA examinations contributed to Wells Fargo’s ability to keep the public in the dark about its longstanding and widespread unsound and unsafe operational problems. The CRA was enacted in 1977 to encourage banks to meet the credit needs of the communities where and with whom they do business, including low- and moderate-income communities and people. As such, the CRA requires federal regulators to review a bank’s lending, investment, and services activities in its assessment areas and provide an overall rating based on these individual evaluations. In 2009, the OCC gave Wells Fargo an “Outstanding” CRA rating, which is the highest possible score. Although the OCC conducted a CRA evaluation of the bank in 2012, it failed to publicly release these results until March 28, 2017. Ranking Member Waters sent a letter to the OCC on October 18, 2016 expressing deep concerns about the agency’s significant delay in making the bank’s 2012 CRA performance publicly available and the potential that its rating would fail to appropriately incorporate the bank’s extensive fair lending and consumer compliance violations, many of which are outlined previously in this report.103 The OCC underscored that it was updating its policies, procedures, and practices “to ensure that, going forward, CRA performance evaluations are completed and published in a timely fashion and eliminating any backlogs” in its January 5, 2017, response.104 Even the bank seemed to acknowledge the agency’s CRA regulatory failures, with its CEO, Mr. Timothy Sloan, stating that, “[w]ith more than four years having passed since the end of our last CRA evaluation period, Wells Fargo intends to ask the OCC to accelerate the timing of its next exam so that [it] may continue to serve most effectively the low- and moderate-income communities in which [it] operate[s].”105

Even more troubling than the OCC’s slowness in publicly releasing the 2012 CRA result is the quality of the CRA evaluation for the bank, which gives the bank an “Outstanding” rating for its overall performance, with an “Outstanding” on the lending test, an “Outstanding” on the investment test, and a “High Satisfactory” on its service tests. While it is true that the OCC ultimately downgraded the bank’s final rating to “Needs to Improve” based on “non-CRA performance factors” related to matters raised in consent orders, the initial rating of

103 Letter dated October 18, 2016, from Ranking Member Waters to the OCC.
104 Letter dated January 5, 2017, from Thomas Curry, Comptroller of the Currency, to Ranking Member Waters.
“Outstanding” calls into question whether the agency really “gives serious consideration to any findings of discriminatory or other illegal credit practices by an institution,” as it claimed in its January letter.

Additionally, the federal prudential banking regulators have also failed to hold the board of directors and senior officers of the largest banks accountable (i.e., by removing them from their positions or holding them civilly liable) for their acts or omissions that contributed to or enabled Wells Fargo’s repeated violations of federal consumer protection laws.106 After the 2008 financial crisis and with the enactment of the Dodd-Frank Act, the federal prudential banking regulators, and the Federal Reserve Board specifically, place significantly higher expectations on the boards of directors of large banking organizations, including the expectation that a board be more involved in risk-management and compliance of the bank with federal banking laws rather than delegated such responsibilities to lower-management.107 However, such heightened board expectations have generally been tied to capital matters of the bank,108 as well as the bank’s compliance with prudential banking laws, such as the Bank Secrecy Act, rather than the bank’s compliance with federal consumer protection laws. And most recently in August 2017, Governor Jerome Powell revealed in his speech, “The Role of Boards at Large Financial Firms,” that the Federal Reserve Board plans to propose a new framework for oversight of bank holding company boards that would seemingly make the boards less responsible for overseeing the operations of the banking organization that directly impact services provided to consumers.109 Given the federal prudential banking regulators’ current reluctance to hold the boards and senior officers of the largest banking organization accountable for egregious consumer abuses, like those exhibited by Wells Fargo, it is not appropriate for regulators to further lessen the oversight responsibilities of the boards of the largest banks.

In response to the fraudulent account scandal and growing cases of massive consumer abuse, Wells Fargo tried to remedy the situation by firing thousands of low-ranking staff, accepting the retirement of the Chief Executive Officer, and terminating a few mid-level officers

---

108 E.g., Under the Federal Reserve Board’s Comprehensive Capital Analysis and Review supervisory process, directors on the boards of institutions subject to the process are required to review and approve the capital plans of their respective bank holding companies prior to the submission of the capital plan. See 12 CFR 225.8(d).

who were deemed responsible by the bank for the consumer law violations. Wells Fargo also clawed back some executive compensation, and made several changes to its board of directors, including recently naming Elizabeth Duke, a former Governor of the Federal Reserve Board, as the new Chair of the board starting next year. However, these actions will not prevent more consumers from being harmed by the bank based on its pattern and practice of flouting the law. Such decisions of whether a director or senior executive officer should be removed or a senior officer should be promoted to lead an organization that has repeatedly violated consumer protection laws for over a period of a decade should not be left solely to the institution. Rather, the federal prudential banking regulators should intervene and oversee the process to prevent the institution from continuing to victimize its customers. For example, the decision of the board of Wells Fargo to elevate Tim Sloan to the chief executive officer position of the bank, even though he was the chief operating officer with direct responsibility for the actions of the bank’s employees during the fraudulent account scandal, raises questions as to whether Wells Fargo’s board is serious about fixing the culture of the bank. However, the federal prudential banking regulators have not publicly indicated any opposition or concern with Wells Fargo’s choice. Due to the reluctance of Wells Fargo’s shareholders to hold its top leadership accountable and fix its corporate culture, the OCC or the Federal Reserve Board should exercise their legal authority to remove the bank’s legacy Board members. Cam Fine, president and CEO of the Independent Community Bankers of America (the nation’s largest community bank advocacy group), released a statement highlighting this disconnect, stating that:

“The most shocking aspect of the multiple Wells scandals is not that some of these practices have gone on for years—it is that Federal regulators have taken no meaningful action against the board and senior managers who were supposedly responsible for the ethical, moral and legal conduct of the bank. Federal regulators haven’t even given them a good slap on the wrist… The Wells Fargo board should be replaced, and so should its senior management. End of story.”

12 On November 16, 2016, the OCC revoked provisions of its original September 29 enforcement action against Wells Fargo for the bank’s fake account scandal. This resulted in a requirement that Wells Fargo must provide the OCC with written notices if it plans to replace board members or bank executives. In spite of this, to date, the OCC has not taken any public action or released any public comments regarding these changes to Wells Fargo’s board or leadership. See Press Release, OCC, Statement Regarding Revocation of Relief to Wells Fargo Bank, N.A., from Certain Regulatory Consequences of Enforcement Actions (Nov. 18, 2016), https://www.occ.gov/topics/laws-regulations/enforcement-actions/statement-wellsfargo-111816.pdf.

13 “The Independent Community Bankers of America, the nation’s voice for more than 6,000 community banks of all sizes and charter types, is dedicated exclusively to representing the interests of the community banking industry and its membership through effective advocacy, best-in-class education and high-quality products and services.” INDEPENDENT COMMUNITY BANKERS OF AMERICA, http://www.icba.org/about (last visited Sep. 6, 2017).

On August 16, 2017, Senator Elizabeth Warren made a similar request to the Federal Reserve Board.\(^{115}\) Given the extent of the scandals discussed above at Wells Fargo, every member of the Board who presided over the banks’ alarming consumer abuses should have been removed by the prudential regulators long ago for failing to conduct adequate oversight of the bank. Furthermore, the OCC’s late public response to the Wells Fargo fraudulent account scandal, delayed downgrade of the bank’s CRA exam, as well as the OCC’s Ombudsman’s report on the agency’s shortcomings in supervising the bank, demonstrate that the OCC failed to use appropriate and effective enforcement measures in curtailing the abusive sales practices of Wells Fargo. Even though Wells Fargo has continued to engage in a litany of consumer protection violations and deceptive business practices, resulting in several lawsuits, the OCC, the FDIC, and the Fed have not publicly announced their intent to use more potent enforcement measures, including consideration of whether Wells Fargo deserves to continue operating certain retail business lines, or, more appropriately, given the laundry list of large-scale consumer abuses, continue operating as a national bank and continue being afforded federal deposit insurance.

III. If Regulators Don’t Act, Congress Must Compel Action to Better Protect Consumers

A. Need for Congressional Action

Banks that are repeatedly cited for violating consumer protection laws, and are generally found to be engaging in reckless unsafe or unsound banking practices that result in the bank being unjustly enriched to the financial detriment of its customers, should not only be restricted from engaging in certain business activities, but also should be considered candidates for losing their federal charters. Federal prudential banking regulators have acknowledged that violations of consumer protection laws can become safety and soundness issues for a bank. In its consent order with Wells Fargo, the OCC noted as part of its findings that the agency identified certain “deficiencies and unsafe or unsound practices in the Bank’s risk management and oversight of the Bank’s sales practices,”[^117] which led to the fraudulent account scandal. And following the Wells Fargo enforcement action, Chair Yellen of the Federal Reserve Board stated in her quarterly press conference in September, 2016, that instances of consumer harm “can become safety and soundness issues,” and “[a]t least one of the lessons from the financial crisis, I think, is that abuses of consumers of the sort that we saw in the subprime lending ultimately did become safety and soundness issues.”[^118] However, both the OCC and Federal Reserve Board have abstained from using their full arsenal of enforcement tools in penalizing or deterring Wells

Fargo from continuing to impose financial harm on its customers.\textsuperscript{119} Because the federal prudential banking regulators refuse to fully employ their enforcement powers under their chartering authorities in instances of egregious consumer protection violations by financial institutions, Congress should pass legislation that would require the regulators to use these existing authorities to revoke the charter of such banks and put them out of business. Congress should similarly require the FDIC to terminate the deposit insurance of such banks. Furthermore, Congress should clarify that federal prudential banking regulators must utilize all of their enforcement tools, including those under their chartering authority, to penalize banks for repeated and extensive consumer protection violations that warrant a more forceful response than a slap on the wrist.

B. Additional Legislative Considerations

In addition to compelling regulators to shut down financial institutions that repeatedly and egregiously harm consumers, and strengthening the ability to shut down banks that extensively break consumer laws, there are additional dynamics Congress should consider to strengthen the enforcement tools that will hold banks and their senior executives and directors accountable for their actions.

For example, federal prudential banking regulators need to hold the board of directors and senior officers accountable for their actions or inactions in ensuring that financial institutions are complying with federal consumer protection laws. One significant barrier to holding senior executives at large financial institutions like Wells Fargo accountable has been the difficulty in demonstrating that high level officials knew about the fraud being committed. This obstacle was recently highlighted by Christy Romero, the Special Inspector General for The Troubled Asset Relief Program (“SIGTARP”), a federal law enforcement agency that is primarily tasked with investigating crime at financial institutions that received federal bailout funds distributed after the financial crisis through the TARP programs. As of December 16, 2016, SIGTARP’s efforts have resulted in 88 bankers being criminally charged and 23 bankers being civilly charged, with 44 bankers sentenced to prison.\textsuperscript{120} SIGTARP concluded that the organizational structure of large financial institutions enables bank leadership to insulate themselves from knowledge of crime or civil fraud. SIGTARP has called for a legislative fix that would require the CEO, CFO, and COO at the largest Wall Street banks to sign an annual certification to law enforcement that they have conducted due diligence and can certify that there is no criminal conduct or civil fraud within

\textsuperscript{119} After being questioned by Senator Warren during the Federal Reserve’s semiannual testimony before the Senate Banking Committee about whether the Federal Reserve planned to dismiss members of Wells Fargo’s board for its consumer protection violations, Chairwoman Yellen indicated that the Board may take further action, stating, “I will say that the behavior that we saw was egregious and unacceptable... we do have the power if it proves appropriate to remove directors. A number of actions already have been taken. We need to conduct a thorough investigation to look at the full record to understand the root causes of the problems. We are certainly prepared to take enforcement actions if those prove to be appropriate.” See Jeff Cox, “Fed is prepared to act against Wells Fargo if warranted, Yellen says,” CNBC, (Jul. 13, 2017), available at: \url{https://www.cnbc.com/2017/07/13/fed-is-prepared-to-act-against-wells-fargo-if-warranted-yellen-says.html}.

their organization. SIGTARP argues that this attestation requirement would then make it more likely that a bank’s illicit conduct would be brought to the attention of the CEO and board of directors.

As previously noted, the Federal Reserve Board, OCC, and FDIC currently have the authority to remove institution-affiliated parties (including senior executives) from banking organizations for certain conduct, and the regulators also have the statutory authority to ban such individuals from working in the banking industry generally, as well as the ability to hold such individuals personally liable for losses to a banking organization, its shareholders, or other persons harmed by the individual’s acts. However, due to the flexibility in management style allowed by banking organizations, board members and senior officers are often able to insulate themselves from the wrongdoings of bank staff and lower management. At the largest banks, supervisory issues identified by bank examiners are rarely escalated to senior executives and the board of directors, which provides such senior officers with the ability to have deniable culpability and thereby avoid being held personally accountable for the wrongdoings of the bank. Congress should consider legislation that would require the board of directors and senior officers of the largest banks to be more involved in oversight of their banks and be informed about supervisory matters identified by bank examiners, regardless of the organizational structure chosen by the bank. Such a law may have resulted in swifter action by the Wells Fargo board of directors and senior management in ending the abusive sales practices identified by OCC bank examiners and noted in their supervisory record for the bank as early as 2005.

In designing a legislative response, Congress should consider focusing attention on the largest banks operating in the United States, such as those affiliated with a global systemically important banking organization. These few banks, including Wells Fargo, currently make up about half of total U.S. deposits and interact with millions of consumers. In addition, previous enforcement of consumer violations by bank regulators tended to focus on smaller banks. For example, research has found that most previous OCC actions regarding violations of consumer lending laws targeted small national banks, even though a handful of large banks accounted for four-fifths of all complaints received by the OCC. One analysis noted that, “[D]uring 1995-2007, the OCC issued only 13 public enforcement orders against national banks for violations of consumer protection laws. Most of those enforcement orders were issued against small national banks…” Furthermore, a number of enforcement tools remain and can be applied as necessary to smaller banks and other financial institutions. Any illegal activity by

---

megabanks, however, that is not effectively deterred will have the greatest negative impact on the American people and the economy. Therefore, legislation should focus regulatory attention and impose the strictest requirements on megabanks.\textsuperscript{125}

Congress should also consider strengthening state authorities.\textsuperscript{126} Because of preemption issues, state regulators have limited ability to curtail bad practices that happen in their states. For example, on February 4, 2003, the California Commissioner of Corporations (“Commissioner”), who is responsible for enforcing California laws for licensed home-mortgage lenders, including a state statute that prohibits lenders from charging interest rates on loans during certain periods,\textsuperscript{127} instituted administrative proceedings against Wells Fargo Home Mortgage Inc. (“WFHMI”) to revoke its license to operate in California. WFHMI is a wholly owned subsidiary of Wells Fargo National Bank that was licensed to conduct real estate lending under the California Residential Mortgage Lending Act and the California Finance Lenders Law.\textsuperscript{128} The Commissioner initiated the proceedings after Wells Fargo refused to comply with its request to conduct audits of its residential mortgages to determine whether it had overcharged interest and provided unduly low estimates of certain classes of settlement fees in violation of California law. On August 12, 2005, the Ninth Circuit held that that the National Bank Act preempted state regulators’ investigative and licensing authority over the operating subsidiaries of national banks.\textsuperscript{129} Because the federal appeals court found that in this case, federal banking law preempted state law, the Commissioner was blocked from revoking Wells Fargo’s license to engage in residential mortgage lending in California, notwithstanding the Commissioner’s intent, and general public interest, of protecting California consumers. State regulators should be able to enforce state consumer protection laws against national banks if it is in the public interest to do so. In addition, Congress should consider allowing state regulators to petition the federal banking regulators to review consumer protection abuses in their states for compliance with federal consumer protection laws and appropriate federal enforcement.

\textsuperscript{126} Title X of the Dodd-Frank Act partially addressed the limits of state authority to adequately protect residents from financial wrongdoing by national banks as occurred in 2003 with Wells Fargo in California, by clarifying, among other things, that a state has the power to apply and enforce its consumer financial laws if it provides greater consumer protections than otherwise afforded under Federal laws for national banks. However, it did not create a clear mechanism for states to force national banks out of the business of banking within their states for egregious violations of consumer protections.

\textsuperscript{127} Cal. Fin. Code § 50204(o) prohibited the charging \textit{per diem} interest on all loans.

\textsuperscript{129} Wells Fargo Bank N.A. \textit{v. Boutris}, 419 F.3d. 949 (9th Cir. 2005).
IV. Conclusion

The federal prudential banking regulators should be more aggressive in their use of enforcement measures against megabanks that demonstrate a pattern of engaging in unlawful conduct that harms consumers. Recently, Federal Reserve Board Chair Janet Yellen hinted that there is indeed more that federal prudential banking regulators could and should do with respect to Wells Fargo. She said, “Let me say that I consider the behavior of Wells Fargo toward its customers to have been egregious and unacceptable. We take our supervision responsibilities of the company very seriously. And we are attempting to understand what the root causes of those problems are and to address them.” Furthermore, the 2008 financial crisis revealed that predatory business practices of banking organizations that harms millions of consumers constitute reckless unsafe and unsound banking practices that warrant regulators’ use of the most severe enforcement tools to combat violations of consumer protections, not just for circumstances that involve prudential matters.

Because of the large profits earned at megabanks, and the substantial number of consumers that have obtained services or products from them, it is particularly important for regulators to focus on these institutions in determining appropriate measures to protect and deter unlawful conduct from occurring at them. Consent orders or settlement agreements that require civil monetary penalties, but that do not otherwise pose any real restrictions or limitations on the business activities of a megabank, have not been effective deterrent measures. As such, regulators’ should use more aggressive enforcement tools to effectively deter large institutions from violating laws and harm millions of consumers.

If federal prudential banking regulators continue to shy away from using these tools, then Congress must force them to do so, in order to protect American consumers and the needs of the public. Congress should also strengthen the enforcement framework to provide for a more powerful deterrent against future bad behavior by megabanks and their senior executives that demonstrate a reckless disregard for the law and their customers. A more holistic investigation into the incidents that have occurred at Wells Fargo, and why regulators’ actions have not been successful preventing the reckless behavior that has been unmasked at the bank, should have been the focus of the Committee’s resources. Even absent this congressional scrutiny, we believe there is sufficient information to demonstrate that legislation is needed to prevent megabanks from repeatedly victimizing consumers, and such legislation should force federal prudential banking regulators to aggressively utilize their most potent enforcement tools, including winding down a bank found to repeatedly violate consumer protection laws.

Legal Actions listed in Wells Fargo’s June 30, 2017 Quarterly Public Filing

**The following text was copied verbatim from Wells Fargo’s Form 10-Q for the quarter ended June 30, 2017:**

“ATM ACCESS FEE LITIGATION. In October 2011, plaintiffs filed a putative class action, Mackmin, et. al. v. Visa, Inc. et. al., against Wells Fargo & Company, Wells Fargo Bank, N.A., Visa, MasterCard, and several other banks in the United States District Court for the District of Columbia. Plaintiffs allege that the Visa and MasterCard requirement that if an ATM operator charges an access fee on Visa and MasterCard transactions, then that fee cannot be greater than the access fee charged for transactions on other networks violates antitrust rules. Plaintiffs seek treble damages, restitution, injunctive relief and attorneys’ fees where available under Federal and state law. Two other antitrust cases which make similar allegations were filed in the same court, but these cases did not name Wells Fargo as a defendant. On February 13, 2013, the district court granted defendants’ motions to dismiss and dismissed the three actions. Plaintiffs appealed the dismissals and, on August 4, 2015, the United States Court of Appeals for the District of Columbia Circuit vacated the district court’s decisions and remanded the three cases to the district court for further proceedings. On June 28, 2016, the United States Supreme Court granted defendants’ petitions for writ of certiorari to review the decisions of the United States Court of Appeals for the District of Columbia. On November 17, 2016, the United States Supreme Court dismissed the petitions as improvidently granted, and the three cases returned to the district court for further proceedings.”

“AUTO LENDING MATTERS As the Company centralizes operations in its dealer services business and tightens controls and oversight of third-party risk management, the Company anticipates it will identify and remediate issues related to historical practices concerning the origination, servicing, and/or collection of indirect consumer auto loans, including related insurance products. For example, in July 2017, the Company announced a plan to remediate customers who may have been financially harmed due to issues related to automobile collateral protection insurance (CPI) policies purchased through a third-party vendor on their behalf (based on an understanding by the vendor that the borrowers’ insurance had lapsed). The Company determined that certain external vendor processes and operational controls were inadequate, and, as a result, customers may have been charged premiums for CPI even if they were paying for their own vehicle insurance, as required, and in some cases the CPI premiums may have contributed to a default that led to their vehicle’s repossession. The Company discontinued the CPI program in September 2016. Multiple putative class action cases alleging, among other things, unfair and deceptive practices relating to these CPI policies, have been filed against the Company in United States Federal courts, including in the United States District Courts for the Northern District of California and Southern District of New York. In addition, the Company has identified certain issues related to the unused portion of guaranteed auto protection waiver or insurance agreements between the dealer and, by assignment, the lender, which may result in refunds to customers in certain states. These and other issues related to the origination, servicing and/or collection of indirect consumer auto loans, including related insurance products, may subject the Company to formal or informal inquiries, investigations or examinations from Federal, state and/or local government agencies, and may also subject the Company to litigation.”

“CONSUMER DEPOSIT ACCOUNT RELATED REGULATORY INVESTIGATION” The Consumer Financial Protection Bureau (CFPB) has commenced an investigation into whether customers were unduly harmed by the Company’s procedures regarding the freezing (and, in many cases, closing) of consumer deposit accounts after the Company detected suspected fraudulent activity (by third-parties or account holders) that affected those accounts.

“INADVERTENT CLIENT INFORMATION DISCLOSURE” in July 2017, the Company inadvertently provided certain client information in response to a third-party subpoena issued in a civil litigation. The Company obtained temporary restraining orders in New Jersey and New York state courts requiring the electronic data and all copies to be delivered to the New Jersey state court for safekeeping. The Company has made voluntary self-disclosure to various regulatory agencies.

“INTERCHANGE LITIGATION” Plaintiffs representing a putative class of merchants have filed putative class actions, and individual merchants have filed individual actions, against Wells Fargo Bank, N.A., Wells Fargo & Company, Wachovia Bank, N.A. and Wachovia Corporation regarding the interchange fees associated with Visa and MasterCard payment card transactions. Visa, MasterCard and several other banks and bank holding companies are also named as defendants in these actions. These actions have been consolidated in the United States District Court for the Eastern District of New York. The amended and consolidated complaint asserts claims against defendants based on alleged violations of Federal and state antitrust laws and seeks damages, as well as injunctive relief. Plaintiff merchants allege that Visa, MasterCard and payment card issuing banks unlawfully colluded to set interchange rates. Plaintiffs also allege that enforcement of certain Visa and MasterCard rules and alleged tying and bundling of services offered to merchants are anticompetitive. Wells Fargo and Wachovia, along with other defendants and entities, are parties to Loss and Judgment Sharing Agreements, which provide that they, along with other entities, will share, based on a formula, in any losses from the Interchange Litigation. On July 13, 2012, Visa, MasterCard and the financial institution defendants, including Wells Fargo, signed a memorandum of understanding with plaintiff merchants to resolve the consolidated class action and reached a separate settlement in principle of the consolidated individual actions. The settlement payments to be made by all defendants in the consolidated class and individual actions totaled approximately $6.6 billion before reductions applicable to certain merchants opting out of the settlement. The class settlement also provided for the distribution to class merchants of 10 basis points of default interchange across all credit rate categories for a period of eight consecutive months. The District Court granted final approval of the settlement, which was appealed to the Second Circuit Court of Appeals by settlement objector merchants. Other merchants opted out of the settlement and are pursuing several individual actions. On June 30, 2016, the Second Circuit Court of Appeals vacated the settlement agreement and reversed and remanded the consolidated action to the United States District Court for the Eastern District of New York for further proceedings. On November 23, 2016, prior class counsel filed a petition to the United States Supreme Court, seeking review of the reversal of the settlement by the Second Circuit, and the Supreme Court denied the petition on March 27, 2017. On November 30, 2016, the District Court appointed lead class counsel for a damages class and an equitable relief class. Several of the opt-out litigations were settled during the pendency of the Second Circuit appeal while others remain pending. Discovery is proceeding in the opt-out litigations and the remanded class cases.

“MORTGAGE INTEREST RATE LOCK RELATED REGULATORY INVESTIGATION” The CFPB has commenced an investigation into the Company’s policies and procedures regarding the circumstances in which the Company required customers to pay fees for the extension of interest rate lock periods for residential mortgages.

“MORTGAGE RELATED REGULATORY INVESTIGATIONS” Federal and state government agencies, including the United States Department of Justice (the “Department of Justice”), continue investigations or examinations of certain mortgage related activities of Wells Fargo and predecessor
institutions. Wells Fargo, for itself and for predecessor institutions, has responded, and continues to respond, to requests from these agencies seeking information regarding the origination, underwriting and securitization of residential mortgages, including sub-prime mortgages. These agencies have advanced theories of purported liability with respect to certain of these activities. The Department of Justice and Wells Fargo continue to discuss the matter, including potential settlement of the Department of Justice's concerns; however, litigation with these agencies, including with the Department of Justice, remains a possibility. Other financial institutions have entered into similar settlements with these agencies, the nature of which related to the specific activities of those financial institutions, including the imposition of significant financial penalties and remedial actions.”

“OFAC RELATED INVESTIGATION The Company has self-identified an issue whereby certain foreign banks utilized a Wells Fargo software-based solution to conduct import/export trade-related financing transactions with countries and entities prohibited by the Office of Foreign Assets Control (“OFAC”) of the United States Department of the Treasury. We do not believe any funds related to these transactions flowed through accounts at Wells Fargo as a result of the aforementioned conduct. The Company has made a voluntary self-disclosure to OFAC and is cooperating with an inquiry from the Department of Justice.”

“ORDER OF POSTING LITIGATION Plaintiffs filed a series of putative class actions against Wachovia Bank, N.A. and Wells Fargo Bank, N.A., as well as many other banks, challenging the “high to low” order in which the banks post debit card transactions to consumer deposit accounts. Most of these actions were consolidated in multi-district litigation proceedings (the “MDL proceedings”) in the United States District Court for the Southern District of Florida. The court in the MDL proceedings has certified a class of putative plaintiffs, and Wells Fargo moved to compel arbitration of the claims of unnamed class members. The court denied the motions to compel arbitration on October 17, 2016. Wells Fargo has appealed this decision to the Eleventh Circuit Court of Appeals.”

“RMBS TRUSTEE LITIGATION In November 2014, a group of institutional investors (the “Institutional Investor Plaintiffs”) filed a putative class action in the United States District Court for the Southern District of New York against Wells Fargo Bank, N.A., alleging claims against the bank in its capacity as trustee for a number of residential mortgage-backed securities (“RMBS”) trusts (the “Federal Court Complaint”). Similar complaints have been filed against other trustees in various courts, including in the Southern District of New York, in New York state court and in other states, by RMBS investors. The Federal Court Complaint alleges that Wells Fargo Bank, N.A., as trustee, caused losses to investors and asserts causes of action based upon, among other things, the trustee's alleged failure to notify and enforce repurchase obligations of mortgage loan sellers for purported breaches of representations and warranties, notify investors of alleged events of default, and abide by appropriate standards of care following alleged events of default. Plaintiffs seek money damages in an unspecified amount, reimbursement of expenses, and equitable relief. In December 2014 and December 2015, certain other investors filed four complaints alleging similar claims against Wells Fargo Bank, N.A. in the Southern District of New York, and the various cases pending against Wells Fargo are proceeding before the same judge. On January 19, 2016, an order was entered in connection with the Federal Court Complaint in which the District Court dismissed claims related to certain of the trusts at issue (the “Dismissed Trusts”). The Company's motion to dismiss the Federal Court Complaint was granted in part and denied in part in March 2017. In May 2017, the Company filed third-party complaints against certain investment advisors affiliated with the Institutional Investor Plaintiffs seeking contribution with respect to claims alleged in the Federal Court Complaint.

A complaint raising similar allegations to the Federal Court Complaint was filed in May 2016 in New York state court by a different plaintiff investor. In addition, the Institutional Investor Plaintiffs subsequently filed a complaint relating to the Dismissed Trusts and certain additional trusts in California.
state court (the “California Action”). The California Action was subsequently dismissed in September 2016. In December 2016, the Institutional Investor Plaintiffs filed a new putative class action complaint in New York state court in respect of 261 RMBS trusts, including the Dismissed Trusts, for which Wells Fargo Bank, N.A. serves or served as trustee (the “State Court Action”). The Company has moved to dismiss the complaint.

In July 2017, certain of the plaintiffs from the State Court Action filed a civil complaint relating to Wells Fargo Bank, N.A.’s setting aside reserves for legal fees and expenses in connection with the liquidation of eleven RMBS trusts at issue in the State Court Action. The complaint seeks, among other relief, declarations that Wells Fargo Bank, N.A. is not entitled to indemnification, the advancement of funds or the taking of reserves from trust funds for legal fees and expenses it incurs in defending the claims in the State Court Action.”

“SALES PRACTICES MATTERS Federal, state and local government agencies, including the Department of Justice, the United States Securities and Exchange Commission and the United States Department of Labor, and state attorneys general and prosecutors’ offices, as well as Congressional committees, have undertaken formal or informal inquiries, investigations or examinations arising out of certain sales practices of the Company that were the subject of settlements with the Consumer Financial Protection Bureau, the Office of the Comptroller of the Currency and the Office of the Los Angeles City Attorney announced by the Company on September 8, 2016. The Company has responded, and continues to respond, to requests from a number of the foregoing seeking information regarding these sales practices and the circumstances of the settlements and related matters.

In addition, a number of lawsuits have also been filed by non-governmental parties seeking damages or other remedies related to these sales practices. First, various class plaintiffs purporting to represent consumers who allege that they received products or services without their authorization or consent have brought separate putative class actions against the Company in the United States District Court for the Northern District of California and various other jurisdictions. In April 2017, the Company entered into a settlement agreement in the first-filed action, Jabbari v. Wells Fargo Bank, N.A., to resolve claims regarding certain products or services provided without authorization or consent for the time period May 1, 2002 to April 20, 2017. Pursuant to the settlement, we will pay $142 million for remediation, attorneys’ fees, and settlement fund claims administration. In the unlikely event that the $142 million settlement total is not enough to provide remediation, pay attorneys’ fees, pay settlement fund claims administration costs, and have at least $25 million left over to distribute to all class members, the Company will contribute additional funds to the settlement. The court granted preliminary approval of the settlement in July 2017. A final approval hearing has been scheduled for the first quarter of 2018. Second, Wells Fargo shareholders are pursuing a consolidated securities fraud class action in the United States District Court for the Northern District of California alleging certain misstatements and omissions in the Company’s disclosures related to sales practices matters. Third, Wells Fargo shareholders have brought numerous shareholder derivative lawsuits asserting breach of fiduciary duty claims, among others, against current and former directors and officers for their alleged failure to detect and prevent sales practices issues, which lawsuits are consolidated into two separate actions in the United States District Court for the Northern District of California and California state court, as well as two separate actions in Delaware state court. Fourth, a range of employment litigation has been brought against Wells Fargo, including an Employee Retirement Income Security Act class action in the United States District Court for the District of Minnesota brought on behalf of 401(k) plan participants; class actions pending in the United States District Courts for the Northern District of California and Eastern District of New York on behalf of employees who allege that they protested sales practice misconduct and/or were terminated for not meeting sales goals; various wage and hour class actions brought in Federal and state court in California, New Jersey, and Pennsylvania on behalf of non-exempt branch based employees alleging sales pressure resulted in uncompensated overtime; and multiple single plaintiff Sarbanes-Oxley Act
complaints and state law whistleblower actions filed with the Department of Labor or in various state courts alleging adverse employment actions for raising sales practice misconduct issues.”

“VA LOAN GUARANTY PROGRAM QUI TAM Wells Fargo Bank, N.A. is named as a defendant in a qui tam lawsuit, United States ex rel. Bibby & Donnelly v. Wells Fargo, et al., brought in the United States District Court for the Northern District of Georgia by two individuals on behalf of the United States under the Federal False Claims Act. The lawsuit was originally filed on March 8, 2006, and then unsealed on October 3, 2011. The United States elected not to intervene in the action. The plaintiffs allege that Wells Fargo charged certain impermissible closing or origination fees to borrowers under a U.S. Department of Veteran Affairs’ (VA) loan guaranty program and then made false statements to the VA concerning such fees in violation of the civil False Claims Act. On their behalf and on behalf of the United States, the plaintiffs seek, among other things, damages equal to three times the amount paid by the VA in connection with any loan guaranty as to which the borrower paid certain impermissible fees or charges less the net amount received by the VA upon any re-sale of collateral, statutory civil penalties of between $5,500 and $11,000 per False Claims Act violation, and attorneys’ fees. The parties have engaged in extensive discovery, and both have moved for judgment in their favor as a matter of law. In August 2017, the parties reached a settlement in which the Company will pay $108 million. The settlement amount does not include plaintiffs’ attorneys’ fees, which are subject to court approval.”
